

Simple Two-Page English Template

Test Author

April 26, 2026

Abstract

This is a simple English LaTeX template for daily testing and course writing. It contains basic sections, formulas, tables and figures, with simple code structure and no redundant packages. The whole document is about two pages and can be compiled normally without errors.

1 Introduction

LaTeX is widely used in academic writing for its neat layout and stable formula display. For beginners, a simple and clean template is more suitable for daily study and simple paper writing. This document provides a lightweight version to avoid complex configuration and compilation errors.

In general academic tasks, basic text, mathematical formulas, data tables and simple pictures are enough to complete most writing requirements. This template fully meets these basic needs.

2 Basic Content

2.1 Mathematical Formula

Inline formula: $a + b = c$.

Standard formula:

$$f(x) = x^2 + 2x + 1$$

2.2 Text and List

Common text content can be arranged logically through lists:

- Simple structure and easy to edit;
- No complicated plug-ins;
- Stable compilation and no error reports.

3 Experimental Display

3.1 Data Table

3.2 Simple Image

4 Discussion

Simple writing can effectively reduce format errors and improve writing efficiency. Too many advanced packages will increase the probability of compilation errors. Therefore, lightweight templates are more friendly for beginners and simple testing tasks.

Table 1: Data Comparison

Group	Value	Rate
A	1a2.3	82%
B	15.6	88%
C	18.9	94%

5 Conclusion

This simple two-page English template is concise and practical. It retains the most commonly used functions and removes redundant advanced settings. It is suitable for daily LaTeX testing, homework submission and short essay writing.
